- 1 Project Description and Pricing
- 2 Project Notes
- 3 Required On-Going Costs for Web Site Functionality
- 4 About August Road (Company Profile & Expertise)
- 5 Letters of Recommendation & Client List

1 | Project Description and Pricing:

Description of Service	Cost
Base Package: Semi-Custom Web Design & Development - Web site creation process begins with a detailed consultation and discovery process. We'll provide basic guidance on design style, content creation, optimizing your site for search engines, making the most of social media, and more. This process also provides a time to brainstorm about the web site's layout and functionality, in order to intentionally plan for positive user experiences. - Web site would be built on the foundation of a Wordpress framework, which allows for rich content management capabilities. This framework also sets a rough guide for the site's layout, color scheme, typography, and functionality. - After identifying the appropriate framework to meet your needs and goals, we will make customizations based around your specific company culture, as well as intentionally designing the site around your logo, content needs, and special requirements. - Web site will be thoroughly tested on a variety of computers, web browsers, mobile devices, tablets, and operating systems to ensure consistent performance.	\$ 3,500
Responsive (Mobile-Friendly) Development & Integration - Mobile-friendly or "responsive" web sites adapt to the size of the computer or device which is viewing the web site, to provide an optimal layout created just for devices of that size. This ensures that whether a user visits your site through a computer, notebook, laptop, tablet, or phone, they'll see a well-crafted layout that fits their screen and is easy to work with. - Responsive design is also a significant factor in online marketing and Search Engine Optimization, due to Google's announcement in early 2015 that it has begun to penalize sites that are not mobile friendly in search engine rankings.	Included with base web site package

Description of Service	Cost
Content Management System Integration & Customization: • Your web site will be built with a Content Management System which will enable you to easily update and maintain your web site without technical experience. Your web site can be updated from any device with an internet connection, at anytime, from anywhere in the world, and can be managed extensively through iPhone or iPad apps. • Client will be able to easily add/edit/remove web site sections, pages, categories, posts, and pages, add images, documents, videos, contact forms, and more. Client will also be able to manage the menu and dropdowns on the web site with a simple drag and drop interface. • Though content management features vary based on which template is selected, page layouts can often be built through a simple, visual drag and drop interface and can be constructed in almost any arrangement desired (full width pages, pages with various column and rows, etc.). The web site will be constructed on a robust and agile grid, ensuring that new pages you build will automatically be mobile-friendly by default. • Ability to add features with a single click such as calls to action, buttons, tables, contact forms, content sections, full-width sliders, image galleries, google maps, recent posts, social media sharing, search bars, responsive videos and more. • Content Management System is extremely flexible and extendable, and includes access to a plugin library with thousands of pre-written scripts which will make it easy for the web site to expand and add new functionality in the future as needed. • We will provide initial support and training for your content management system, free of charge, until the client is comfortable making updates using the system.	Included with base web site package
Q&A Form Integration & Development of Form System for Other Web Forms • Includes system to easily and visually create online forms such as question submission forms (for the online Q&A), contact forms, registration forms, etc.. Forms can be created with a drag and drop functionality, allowing you to quickly and easily create simple or complex forms with a variety of fields, such as radio buttons, checkboxes, dropdown menus, text areas, etc. • Complex forms can also be easily created, allowing for file uploads, payment to be made before a form can be submitted, condition fields (which show or hide other fields based on user choices in other parts of the form), multiple page forms, and forms with content injected into the middle of them. • Forms can include captchas to prevent spam, and can be customized to send results to different people depending on which department the message is intended for.	Included with base web site package

Description of Service	Cost
Membership / Subscription System Development, Integration & Customization • Implementation of subscription / membership system which would allow users to select a membership level and receive the appropriate content for that subscription after paying for a membership. Each user would have their own user name and password-protected account. • The content for each membership level would only be available for registered/ subscribed members of that level, and would not be viewable to the public or subscribers of another level (for example, a "silver" subscriber would not be able to access "gold" content, however you could set up "gold" members to receive both "silver" and "gold" content). • Content could be made available immediately upon subscription, or via a drip schedule set up to your needs. • Customers can be managed and edited as needed directly within the web site system. If desired, members would be able to upgrade/downgrade their membership level automatically, as permitted by membership system system. Customers would also be able to update their payment information or other account information directly. • Includes setup of payment and registration pages. • Trials/discounts could be offered as desired.	\$ 1,500
Newsletter Subscription Form Integration • Includes integration of newsletter sign-up form so users can easily register/subscribe for email updates. This integration will utilize your existing newsletter service's database, so if you have not already, an account with a newsletter service provider would be required. • We recommend MailChimp if you do not already have a provider, but could also integrate sign-up forms through Constant Contact, aWeber, BombBomb or other major newsletter providers.	Included with base web site package

Description of Service	Cost
Social Media Integration - Includes integration of basic social media accounts, such as links to Facebook, Twitter, or Instagram. - Tweets could be included/embedded the web site so the web site always reflects the latest social media updates. - YouTube videos could be embedded into the site and updated automatically based on the "channel" they are uploaded to.	Included with base web site package
Events and Calendar System - Development and customization of advanced events management system within your web site. - Events can be shown on an events page and browsed by list / agenda view, in a calendar view by week or month, or searched by keywords. Events can also be pulled directly onto the home page to give an at-a-glance view of upcoming events. - Events can also include Google Maps, more details and event logistics, recurring events, and online event payment/registration functionality.	Included with base web site package
<i>Proposed Project Total</i>	\$ 5,000

2 | Required On-Going Costs for Web Site Functionality

In light of the required functionality on this project, a variety of on-going costs are required for continued functionality. These costs are in addition to the project development total outlined above, and are estimated below for your reference. Most of these expenses are to third parties, and pricing is subject to change, though this section should provide a close approximation of ongoing cost.

- Additional **one-time cost** necessary for third party expenses (not August Road expenses), such as:
 - Licensing of Wordpress framework
 - Software plugin licensing for membership and YouTube embedding systems, and other software plugins as needed
 - Creative resources such as stock photography or other design resources
 - *These expenses would be additional to the project cost and are estimated to be between \$40-80 one-time fee.*
- Additional **annual costs** would also be necessary, such as:
 - Domain name registration/renewal
 - SSL Certificate, which encrypts payments for security reasons
 - *These expenses would be additional to the project cost and are estimated to be \$60 / year.*
- Additional **monthly costs** would be necessary, such as:
 - Web hosting, which keeps the web site available online. Your web hosting account *would require a dedicated IP address* to ensure secure payment processing capabilities.
 - Client can choose their own hosting provider that meets minimum technical requirements, or August Road can manage these services for \$30 / month if that is preferred. We also offer an ongoing maintenance option, which includes web hosting, email address hosting, technical support, monthly Wordpress upgrades, monthly plugin updates, SSL security encryption renewal, and priority web site support for \$50 / month ongoing.
 - Membership system requires ongoing monthly pricing, starting at \$19.99 / month for 1,000 members or less.
 - Client would need an ongoing account with a payment gateway provider to process payments securely online. Given your needs, we recommend an account with Stripe. Pricing and information can be reviewed at stripe.com.
 - *These expenses vary based on number of payments/members processed.*

3 | Project Notes:

- Our semi-custom web design projects start with a Wordpress framework and design decisions are guided by this framework. We make a significant number of custom adjustments and modifications to fit your design requests and desired style, and to ensure a high-quality, mobile-friendly look. Even so, this project does not include fully custom design (which would start with a more thorough consultation process and include a design mock-up phase with design approval prior to development), so the design of the site will be modified as the web site is being developed. We pride ourselves on high quality design and will work with you to modify the design as much as possible to meet your needs within the scope of this semi-custom project.
- Given budget limitations, this proposal does not include every feature initially described on client's requested functionality document. In particular, this proposal does not include search engine optimization, shopping cart development, online donation collection, Instagram embedding, interactive connectivity between members (via forum or other mechanism), or blog subscription capabilities. *All of these features/services could be added to the web site easily on the framework we would build in future phases.*
- Content Management System makes it simple to update web site copy/content (including page text, photos, videos, navigation menu, etc.). The Content Management System would provide the ability to lay out pages in a visual way as well as add a number of well-designed components to the web site. Even so, it is primarily intended to be a content management tool, not a design management tool meaning more custom design enhancements requested would require professional assistance.
- This proposal includes consultation for web site copy, design, development, and user experience, but does not include copy writing or content creation (which will need to be provided by the client unless otherwise stated).

4 | About August Road (Company Profile & Expertise)

August Road is an award-winning web development and graphic design consultancy based in Bloomington, Indiana. Since 2008, we've been crafting high-quality, completely custom web sites & design projects, made from scratch to meet our clients' needs.

As an experienced creative consultancy, we've developed web sites for companies in 14 states and 7 different nations. We recently developed a site for a company featured in the New York Times, and previously, we were behind a USA Today "Hot Site" award-winner.

Our work revolves around beautiful design and well-crafted development. Throughout each project, we provide trusted guidance as experienced, easy-to-work-with creative consultants.

Bringing to the table a collective 15 years' experience on projects of all sizes and scopes, we collaborate with energetic start-ups and established organizations, with international companies and local businesses in our own backyard. We have worked with clients in the business, government, education, and non-profit sectors, and are acquainted with the various advantages and challenges that come with each field.

More than just web developers, we pride ourselves on creating beautiful design with high attention to detail and layout. More than just designers, we also are adept in front-end web development, hand-coded coding web sites to the latest standards.

We approach each project with intention, instinct, and integrity, recognizing that the relationships we build with our clients are the backbone of our business.

Since people matter more than projects, we go out of our way to make the design experience smooth and simple. We book fewer projects to be more present. We listen longer as we learn to speak your story well.

We'd love to go the extra mile for you too.

Our Team

August Road was founded in 2008 by Jordan Warner (our Creative Director). With a prior background of over 10 years of design and development experience, Jordan started August Road with a simple philosophy: *people matter more than projects*.

Because of this, we believe in providing abnormally positive experiences backed by high quality work. We book fewer projects so we can be more present and responsive to our clients.

In addition to Jordan, who is full-time at August Road, our sub-contract team includes Tristan Mason and Luke Warner. Tristan directs our local *Launch Bloomington* web creation workshop events and provides development, photography and videography services. Luke is an experienced computer engineer and php / mobile application developer who provides back-end development and support on complex projects.

JORDAN WARNER
Creative Director

5 | Letters of Recommendation & Client List

"When I began developing Limestone Post magazine, I spoke to many talented designers in Bloomington, many of whom seemed capable of producing a quality website. But talking with Jordan Warner at August Road, I immediately had confidence in his ability not only to understand and build what I was hoping to create but also to help me understand the intricacies and complexities that the project would entail.

Perhaps more important than anything else (because I'm not a techy), I trusted Jordan and his team's judgment and recommendations on the often complicated development and implementation of the system. They were clear and precise in estimates of time, cost, and end results. Their knowledge of website functionality helped in ways I had not even considered before embarking on this startup. And they didn't just perform the work with exceptional skill, they made sure I knew where we were in the process.

It is obvious that August Road has had considerable experience in working with both new and established companies. Without hesitation, I fully recommend August Road to anyone wanting to build a website or boost the performance & effectiveness of their existing one."

Ron Eid, *Limestone Post Magazine*
Bloomington, Indiana

"August Road has been amazing to work with! Their work exceeded my expectations and left me extremely satisfied with choosing August Road. From our first meeting I received the time and attention you always hope you'll receive but rarely do. They took my website, logo and print advertising to the next level. I am extremely satisfied with their work, responsiveness and the overall experience. I'm very impressed with August Road and give them my highest recommendation!"

Colin Carr, Carr Healthcare Realty
Denver, Colorado

"Working with August Road Design has been an outstanding experience during the entire web design process. August Road delivered an exceptional product for a far more of a reasonable cost than any other competing company. Our company web site turned out ten times better than we were planning, in both look and functionality. I would recommend August Road to anyone looking web or graphic design and definitely look forward to continued work with this company!"

Jace Hassoldt, King Companies
Dallas, Texas

"We have received referrals to several businesses throughout our 14 year history, and I would have to say that in my experience, few have ended up with as results as good as those of August Road. The company took a previously shoddy and outdated website and completely revamped it almost entirely to our specifications and expectations, and then some. For us, this project was more than a complete website makeover and a marketing effort for the new year - it was a critical investment. And the returns on the investment indicate that it was one of the most worthwhile we've yet made. The project was high-quality, and the customer service was exemplary and superb. 10/10 - thank you, August Road!"

Jimmy Sengenberger, Liberty Day
Denver, Colorado

"We heard from someone last week saying, '*If I loved your website any more I'd die.*' I think it's safe to say we're all thrilled with your product."

Anna Branam, Urban Fitness Studio
Bloomington, Indiana

"A few years ago I started a small apparel company and decided that the next natural progression to growing my business should instead be web based. I was determined to do my due diligence when it came to selecting a web design company. I had a specific vision in mind and I knew how I wanted the site to look and operate. I'm very involved in my branding so my criteria was stringent. As a small business owner I had a specific budget and I needed a complete site ready to go within my budget. I interviewed close to ten different companies large and small to get an idea as to feasibility, suitability and cost. Having a pure custom site was very important to me, so after the process of elimination it was clear August Road had a good understanding of my goals, my vision and my budget.

From the very beginning to the very end of the project, August Road gave us great detail of what was going on, how the project was progressing and kept us on task of delivering the content we needed to provide to him. The lines of communication were open and free flowing and we were always given ample input to alter something that needed changed as we watched the project progress. The end result is a web site that we are extremely pleased with and carries forward the vision that we had for our on-line presence. The follow-up service has been great as well. We will continue to use August Road for all of our additional on-line needs. I would recommend this company to any firm that is looking to build or improve their web based business segment."

Michael York, *Skinner Box Clothing Company*

Chicago, Illinois

"From brainstorming to production to post-launch, working with August Road Design has been a wonderful experience. Jordan was able to take our broad concepts and turn them into an amazing website that was exactly what we wanted but hadn't been able to envision.

August Road did a fantastic job merging visual elements with the functionality we needed. They explain every step in a way that is easy to understand and consider all their options while tackling a roadblock. Jordan has spent hours making sure that we understand everything needed to manage our website on a day-to-day basis.

We have been receiving nothing but great feedback about our site. I highly recommend August Road for projects large and small."

Lynae Sowinski, *Limestone Post*

Bloomington, Indiana

"Hiring August Road was an obvious decision for us. When other website firms wanted a complete website concept and layout upfront, we were unable to justify hiring them as 'experts'. August Road realized our organization's expertise is in administering our housing programs, not website design.

It was refreshing that Jordan asked for a few basic word concepts from us, used those words as a springboard and created a professional looking website geared towards a wide audience. They took the appropriate amount of time to understand our requirements, making suggestions to our dilemmas that were cost-effective, visually appealing and user-friendly.

Organizing our massive amount of website content was a huge process, however August Road integrated many features to streamline the information into webpages that were clean, professional looking and easier to read for our varied clients. The web site was done on time and within budget. Jordan continues to stay in communication with us even after the website has launched. As you can see, we are very happy with the work August Road has done for us. If you are looking for reliable and creative communicators with solid judgment, the BHA highly recommends August Road."

Amber Gress, *Bloomington Housing Authority*
Bloomington, Indiana

"Recently we developed a new website with August Road Design. It was a very positive experience from start to finish. A stand out in our work together was the speed at which the work was completed. We needed a fast turnaround for a large customer conference and August Road delivered in style. Also, the site itself is designed in such a way that we can refine our message based on customer and market feedback - not only that but they helped us develop a simple content management system so we can edit the site remotely and by ourselves. This flexibility and empowerment are extremely valuable as a start up.

August Road then helped us develop an e-commerce site. Yet again it exceeded our expectations in terms of functionality and scalability. We were again able to customize parts of the shopping cart to fit our products. All in all, we have a very efficient and powerful site that can be very easily scaled. Not only that but we continue to work with August Road to develop a web-application and build the site to create more value for our customers and ultimately multiple revenue streams for our business. August Road have been outstanding to work with - we will continue to partner with them for a long time to come."

Ciaran Byrne, *Mensani*
San Fransisco, California

"August Road was extremely helpful from the conceptual stages of logo development all the way through to the final web site product. They provided us with an accurate and helpful timeline for the work and despite delays on our end, completed the project well and within the deadline set. It was a pleasure to work with August Road!"

Dawn Vargo, *Rising Voice*
Colorado Springs, Colorado

"August Road not only provided great site design and functionality, but took on our project in the middle of a major brand redesign, under a very short timeline and looming deadlines.

Our site went from static and difficult to update to dynamic and easy-to-update, and within our deadline. They listened to our start-up business needs, provided recommendations, and clearly communicated milestones throughout the project. When I've had minor questions post-project, they've been responsive and helpful. It's been a completely positive experience and I wouldn't hesitate to recommend August Road."

Liz Vernon, *BYNDL Inc.*
Seattle, Washington

"With August Road's help, I was able to go from having a web site I was embarrassed about - and that no one knew about - to a web site that people had already heard of, and that I was proud to send people to. With the help I got in graphic design, search engine optimization, colors and layout, I was able to have a website which wouldn't just work for today, but was ready to grow along with me."

Travis Jeffords, *The Open Door*
Bloomington, Indiana

"The website has really helped us showcase our space. We feel more empowered to work on the site, as August Road has set us up with a foundation that we can work on into the future. It's been a blast collaborating with August Road, and I would highly recommend it."

Carly Dunnuck, *Urban Fitness Studio*
Bloomington, Indiana

"When looking for someone to design the logo for my new business, I quickly discovered that designers are a dime a dozen, with lots of variation in both price and quality. I chose to work with August Road on a hunch, and am very happy I did. They were prompt, took the time to understand what I envisioned, and worked with me through multiple revisions until striking on a design that was perfect.

Since the logo went public several weeks ago (as my business launched), I have received many compliments on it, both for its originality as well as for its overall 'feel.' If you're looking for a graphic design company and you feel it's important that your design reflect your company's personality, August Road has both the design and people-skills necessary to understand what you're looking for, and translate that understanding into a great design."

Jennifer Pearson, *Healing Paths Veterinary Hospital*
Colorado Springs, Colorado

"August Road is not only the friendliest web design company, but they were truly dedicated to making sure that the final design uniquely and creatively represents your company. August Road made sure we understood every step of the project and very willingly helped us through the parts we were unfamiliar with. We are thrilled with our logo and web site."

Alex Palomares, *CBC Mexico*
Queretaro, Mexico

August Road's work on our web site was outstanding. They completely understood the look and feel we wanted, and created a site that met our needs and earned us a lot of positive feedback. They were very professional and easy to work with, and finished our project on time and within budget. As future projects come up, August Road is definitely who we'll use."

Karen Eaglin, *Project Manager*
Colorado Springs, Colorado

"August Road has really done a fabulous job and we couldn't be happier. We are super impressed with the quality of their work. They absolutely know what they're doing."

Trent Crohn, *Professional Golfcar Corporation*
Bloomington, Indiana

"If a picture is worth a thousand words then your logo, web design, and graphics are worth ten thousand words in connecting with the people of today's culture. August Road keeps our church on the cutting edge. Every time I throw them a new logo or web site, they knock it out of the park!"

Dean Hawk, *Rock Family Church*

Colorado Springs, Colorado

"Just wanted to thank you for all your help with our web site. We are very very happy with the result. I just got a sneak peak and actually stood out of my chair, pumped my fist and shouted out 'Yesssss!!!!!!' Overall, the website has the perfect look and simply looks legit and right."

Michael Reventar, *AWMI Canada*

Toronto, Ontario

"August Road Design provides personalized service and cares about customers' needs. Jordan Warner is a true professional. He takes pride in his work, is easy to work with, meets deadlines, and goes above and beyond to assist in "emergency" situations. There have been several instances when we've had requests for website updates and Jordan has taken time away from his weekend or vacation to address our needs."

Lynn Stenftenagel - *The Michelli Experience*

St. Petersburg, Florida

"Working with August Road Design has been such a pleasure. We were not very knowledgeable in technology or design but they made the whole process so easy by being totally available to answer as many questions as we had. They also asked many questions of us in order to come up with a unique site custom made to fit us.

We were referred to August Road from another very satisfied customer and we have already done the same. Now we have a top-notch professional website that portrays our style perfectly and we got it for a great price. Thanks August Road."

David Forgoston, *Forgoston International*

Switzerland

"Our organization utilized August Road Design to help us redesign our Indiana Association of Naturopathic Physician's web site. We have been very pleased with both the journey of working with August Road, and with the final web site product.

August Road was both very knowledgeable and easy to work with. They were able to help us create our vision for a new site, and were very responsive and pleasant during our communications while working up to the design. August road has been willing to do what it takes to make sure that the final design meets our needs, desires, and expectations. They were able to make excellent suggestions to help the project fit into our budget restraints, and got the project done in a timely manner.

I highly recommend August Road for web site design work, and plan to continue our relationship with August Road into the future."

Amy Clewell, President, Indiana Association of Naturopathic Physicians
Indiana

"We loved working with August Road as they designed us a brand new site. Great with graphics, user-friendly and looks awesome. We highly recommend their service."

Lawson Perdue, Charis Christian Center
Colorado Springs, Colorado

"We LOVE the logo and web site! You hit it right on! We can't stand how much we love it! Your work was a wonderful hit with the over 10,000 attendees of the event! We're thrilled!"

Denise Menke, Great Community Picnic
Carrolton, Kentucky

"I am writing to recommend the services of August Road for web design. They were able to quickly identify what type of design and site fit our needs, and were very thorough in explaining the process and exceeded the clearly defined expectations along the way. We are very pleased with the look and feel of our web site. If you are looking for help in getting a quality web site, I highly recommend August Road."

Lester Burris, Panacea Pharmacy
Indiana

"I am happy to say that August Road did an awesome job for us. We are so pleased with the website. They did an outstanding job of making our website exactly what we wanted to represent us and what we are about in an interesting, creative and professional way. We have had wonderful comments from so many people that have visited our site. The customer service is great. Any updates we have needed to the site are made extremely quickly, and they always respond to any email questions we have within a day. Our organization is in Thailand, so this is very important to us. The price was well worth it. I would recommend August Road to everyone that is considering a website."

Jeff DeVine, DeVine Ministries
Thailand

"Great Quality, Great Service & Great Price. Thank you August Road for the extra help and superb customer service!"

Jerry D, Jerry D Music
Colorado Springs, Colorado

"It's been a pleasure to work with August Road. I can't think of any way they could have been more helpful. If we ever have future needs, we will certainly use August Road."

Gene Gebel, Stat Laboratory
Bloomington, Indiana

Client List

Though our clients come from an array of backgrounds, industries, and disciplines, many have become friends. We're thankful to work with great people across the globe, and we'd love to continue that tradition by partnering with you on your next design project.
